

FUTURE SCIENTIST?

On April 2nd a very important guest - Sofia Bunai, accompanied by her mother and grandmother, visited our lab. Sofia got a complete guided tour around the lab and expressed definite interest in what she saw. We think that she was born to become a scientist, like her mom.

Work in progress

ODU post-doc Deifeng Gu, is shown here using our AFM. Deifeng is also helping us improve our ellipsometer software.

On April 10th, WM graduate student Derrick Manzlak came to the ARC labs to use our microscopes for his NASA project.

Joan Thomas is working hard on her project in environmental chemistry. Here she is pictured checking the beam alignment in the FT-IR DRIFT accessory.

NEW IN THE ARC

Pictured above is Nick Moore, a senior at Lafayette High School in Williamsburg. He came to work in our lab during his spring break. This summer he will be working as a Lab Tech.

LAB VISITORS

Jay Anderson, an account manager at Veeco Instruments Inc., visited our lab on April 12th. He is pictured on the left, talking to Amy Wilkerson and Marija Rascovic about improvements for our SPM system.

Guy Messenger (right picture, left) is a director of Eastern Sales for Physical Electronics. He paid us a visit on April 17th, and discussed questions, concerning ToF-SIMS with Dr Haijian Chen and Amy Wilkerson.
