LAB VISITORS AND TOURS

On April 17th Roy Crooks and Rod Linnekin, from Black Laboratories, visited the lab with Adam Steinman from QubicaAMF.

Amy took them on a guided lab tour and spoke about our equipment and its capabilities.

Olga assisted Amy by demonstrating how some of our equipment works.

On April 18th Amy conducted a guided tour for two visitors, Dr Lewis DeSandre from the Office of Naval Research, and Fred Marcell from Naval Sea Systems Command. Research Scientist, Joan Thomas, and lab techs, Natalie Pearcy and Olga Trofimova demonstrated sample characterization techniques available in our lab.

WELCOME HOME DEE DEE!

Dee Dee Hopkins (left) graduated from WM a year and a half ago. Since that time she has been working at the US Patent Office in Washington, DC. She doesn't forget our lab and comes to visit when she is in town. (Pictured here with lab tech Natalie Pearcy)

Lab Visitor

David Stegall is a hard working guy. He not only works in the contracting department for Northrop Grumman Naval Shipyard, he also owns his own company and is earning his Ph.D. at ODU. His graduate work, for Dr. Elmustafa, involves analyzing the dislocation structure around micro-nano indentations. He visited our lab on April 26th to inquire about our surface characterization equipment.

JOB WELL DONE!!

Deifeng Gu, an ODU post-doc, did a brilliant job improving our variable angle ellipsometer software. The VASE ran on Windows 95. He was able to configure it for '98 and the device is working great. On the left Deifeng is pictured with Dr. Hani Essayed-Ali and ODU grad student Ibrahim Elkholy.
