

ToF-SIMS Repair

A team of ARC techs & post-docs came together to retrieve a misplaced sample holder in the ToF-SIMS. It took four days of great teamwork, to get the ToF-SIMS running once again. Good job everyone!

Summer Program Completion

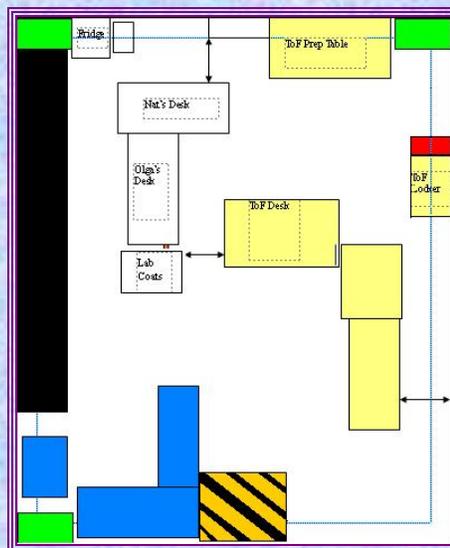

Eric Kimsey, working in the J-lab's summer TAPS program, has successfully completed his collaboration project with Colonial Williamsburg. Good job Eric!

Work in Progress

Bubba Bullard (JLAB) brought in an extremely large item to inspect using the Hirox microscope. This is the largest item we have inspected with the microscope and proved once again that the Hirox can get the job done. Natalie is shown here assisting Bubba.

ARC Lab 123 has gone through some remodeling to better suit the needs of the lab's occupants. The ARC crew moved and organized many of the lab's cabinets and desks to create this new scheme.
