

HAPPY HOLIDAYS

A Holiday Party at the ARC

The Holiday Party at the ARC took place during the lunch hour on December 19th. As usual, the gifts and food arrived first. We all had a great time being creative when we picked out dollar store presents.

Quite unexpectedly, Olga's Birthday happened to be that exact day. We were all able to surprise her with a birthday cake. I guess she didn't think we would remember. Everyone was inventive and creative in choosing gifts for their coworkers, so as always, the party turned out to be lots of great fun.

EVERYTHING IS UNDER CONTROL

Dennis Manos, WM Vice Provost, visited the lab on December 20th. Here, Amy is showing him some ideas she has for a new CD to showcase ARC lab equipment and capabilities.

Next, Dr. Manos spoke with Natalie about ideas he has for the laboratory equipment and capabilities CD.

Lab Visitors

Mahzad (left picture, left) is a frequent user of the Hirox microscope. She came again on December 19th to show the microscope to Tamer Akan (right), a Post-doc at the Center for Bioelectrics (ODU), who was touring the ARC.

Other visitors to the lab include NNPD Officer John Parker and his daughter Stephanie. She is a high school student at Hampton Roads Academy. Stephanie is planning to work in our lab this summer.
