#### Hirox Microscope Demonstration

February 17<sup>th</sup>, 2005

On Thursday, February 17<sup>th</sup>, Ben Durvin and Terry Suzuki from Hirox 3-D Video

Microscope Solutions hosted a demonstration in the lab of their high resolution microscopes. In attendance were Natalie Percy, Amy Wilkerson, Olga Trofimova, Nimel Theodore, Laurel Averett, and Dee Dee Hopkins from our lab, as well as several others from neighboring labs.

Richard from ODU and Ben Durvin from Scogil Scientific (above left) listen attentively as Terry Suzuki (above right) explains the capabilities of Hirox microscopes

On the right is a Hirox image of the tiny beads encased in an over-the-counter time release capsule

Onlookers Amy, Nimel and Laurel listen intently as Terry Suzuki gives another demonstration of the microscope

#### New Graduate Student

Ron Quinlan is a first year graduate with the William and Mary Applied Science department. He will be working with Brian Holloway at the FEL making carbon nanotubes.

#### Working Hard at the ARC

Dee Dee and Natalie work on unpacking lab supplies for Michael and Nimel

Dee Dee and Amy listen as Dwayne Trussel, who represents VWR International, talks about the various research organic and lab chemicals that the company offers.

Happy February!
