

Applied Research Center Student Newsletter

SPECIAL GUESTS

On January, 26th a group of visitors from NIA visited the ARC and attended a guided tour of our lab and a number of the other universities' labs. Pictured above from left to right are: Dennis Manos, W&M Vice Provost; Mike Marcolini, Quiet Aircraft Technology Program Director, NASA, Langley; Mike Halick US Airforce, on Education in Industry assignment to NIA; Bo Walkley, Director of Research Program development, NIA; David Peake, Vice President of Research & Program Development, NIA; Bob Lindberg, President and Executive Director, NIA.

WORK IN PROGRESS

On the 20th of January Haijian Chen, a Postdoc at W&M, came to visit our lab for a meeting with Dee Dee to discuss the Biomotor project they are currently working on. Haijian was accompanied by

Liang Wei (pictured above standing to the right of Haijian), 2nd year grad student in Applied Science at W&M.

Haijian and Dee Dee used the Hirox microscope to make some measurements of his samples.

NEWS IN THE ARC

It's nice to see familiar faces in the lab again. Michael just got back from a semester in Singapore. Shannon Watson stopped by the lab before heading off to start her new job at NIST in late February. Pictures were taken 01/27/06. Chris Hendricks is also back.

Reunion in the ARC

Amy showed Tina Bunai around the lab. Tina is a new research professor at the College of William and Mary in the Applied Science department. She specializes in mass spectrometry. Welcome to the ARC, Tina.
