

Work in Progress

An ODU graduate researcher and a regular user of the AFM, Marija Rascovic, and her advisor, ODU Professor Vusvovic a physics professor and graduate program director, visited the ARC labs to check out the equipment, while Lab Tech's Natalie and Olga discussed the equipments use and functions.

Hirox Upgrade

Terry Suzuki, from HiROX, upgraded our microscope with new software. The new software allows the Hirox to reassemble multi-focus images into a three-dimensional model.

New Face in the ARC

Nate Hussell, a sophomore at Virginia Tech studying music, has joined the ARC crew for the summer. Welcome!

Lab Visitors

On July 11, the ARC labs were visited by the State of Virginia, Economic Development Partnership (VEDP) delegation. Amy Wilkerson discussed the work that is taking place in the ARC, along with the equipment.

Dr. Kang Seo, research associate professor, and Dr. Anil Mahapatro, assistant professor of chemistry, both at NSU and Abhijit Jadhav, a Ph. D student at the University of Cincinnati, visited the ARC labs.

Sue Ellen Walbridge, program manager at the US Department of Education, talked with Gary Graham about his role in the TAPS program. Gary discussed his progression as a teacher in the program and its benefits to him.
