

Applied Research Center Student Newsletter

AFM AT USE

Deifeng Gu, an ODU Post Doc, has become a frequent user of our AFM. Pictured above on the right, he is teaching ODU graduate students, Stanley Artis and Rochell Santos, how to operate it to characterize IBM samples for their advisor, Professor Baumgart.

Pictured here is Deifeng with ODU students Kanda Tapily (standing in the back) and Pragma R. Shrestha.

LAB VISITORS AND USERS

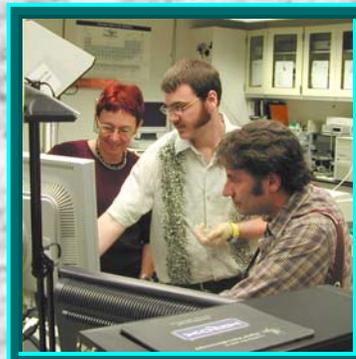

On March 23rd our lab was visited by Dr. Kang Seo, NSU, (left picture, next to Amy), who brought with him Hyun Park, a Johns Hopkins University Post-Doc.

On March 21st Dr. Yuri Barnakov, NSU, found that the Hirox microscope was the best choice for obtaining images of his nonconductive samples. Also pictured is Amy assisting.

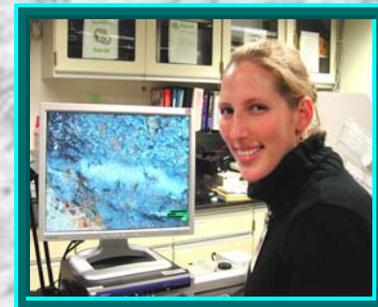

WE ARE INVOLVED IN
HISTORIC PROJECTS

Jason Lunze (left picture, center) is a WM undergraduate student. He uses our lab equipment in his research of samples from the Hunley submarine. On March 20th, WM photographer Stephen Salpukas joined Jason and Olga to take pictures of Jason's work.

Susanne Grieve works for the Mariners' Museum Conservation Project of the Monitor. She uses our lab's microscopy techniques in her work. Susanne is planning to start the WM Applied Science Ph.D. program.

Nimel's Farewell Lunch

On March 27th Nimel's farewell lunch took place at the Nawaab restaurant in Williamsburg. Pictured here with Nimel are Ron Outlaw and Dennis Manos.
