2006 JLAB RUN-A-ROUND

The 21st Annual Run-A-Round took place Wednesday, May 17. The race is a celebration of spring and an opportunity to get together as a community and enjoy the warm weather. As any event of such caliber, it could not take place without volunteers. Volunteers from the ARC included:

Amy Wilkerson
Natalie Pearcy
Joan Thomas

The course included the areas around the Jlab and consisted of 2 halves. The total length of the race course added up to 1.5 miles.

Olga Trofimova, representing the WM ARC Labs, won the race in her category and received a trophy.

LAB VISITORS

DeeDee came on Friday, May the 19th to visit us for lunch. DeeDee completed her work in our lab on a project on biological applications of ToF-SIMS and is now working in the biomotors division of the USPTO (United States Patent and Trademark Office).

Also visiting the labs in May was David Thompson, a CWM chemistry professor. He is pictured here with Amy.

WORK IN PROGRESS

Derrick Manzlak is using the AFM to characterize protective fibers for a project that he is doing for NASA, his full time employer. Derrick is a master's student in chemistry at the College of William and Mary.
