

Gary in Space!!

Gary Graham (in the middle floating) is a former summer employee of William and Mary through Jlab's TAP's Program. Recently Gary experienced weightlessness!! As a part of a group, said to be the best of Middle School teachers, Gary was able to fly up to the tip of the atmosphere and free fall, while still in the plane, and experience a weightless environment as if they were in space. To read more about this go to web page: <http://www.northropgrumman.com/community/weightless.html>

Hirox Training

On October 12th, Olga taught the fundamentals of operating the Hirox microscope to a group of scientists from the Mariners Museum. David Blanchfield, Helen Stockman-Todd, Shelly Svoboda, Chris Swan, and Pam Young attended the class.

AFM Training

On October 5th, Olga taught Will Sommers, Mahzad, Aiyana Garcia, Jonathan Skuza, and David Stegall how to operate the atomic force microscope.

Keyence Microscope Display

On October 10th, Fred Poelzing, Thomas Takao, and Patrick Scully set up the Keyence Microscope to show off it's capabilities to the ARC staff.

Scientists from WM, NSU, ODU and JLAB brought samples by to examine.
