## Olga's Trip to the Grand Canyon and Death Valley

In Death Valley, the temperature reached 122 degrees, and as a result of the intense heat Olga's husband's shoes started melting.

View of the Death Valley landscape.

The walls of the Canyon are steep and in layers.

Helicopter aerial view, of the canyon and river.

## Lab Birthday's

Nicholas "Nick" Moore, the most recent addition to the William and Mary Arc Lab Technician team, has turned 18.

## Lab Visitors

Amy showed lab equipment to visitors from Black Laboratories and Northrup Grumman Newport News

Judd Compton, a Doctoral student at the College of William and Mary, learned to use our Hirox Microscope to look at samples.

Nick assisted Judd with his samples, showed him how to use the various features of the system and scanned his results to a flash drive.
