### DETAILS:

Below are the results from the CNC/region 1 prototype survey performed on June 19, 2007. A right handed coordinate system was established using the CNC table as the XZ base plane/Y origin, and the 1- 3/8" sphere as the XZ origin. The +Z axis is formed from a bisected line between tooling balls 1 through 12 on each side. Values are in millimeters.

### TOOLING BALLS:

The following offsets are derived from constructing planes on each side plate using the four corners. The values show the amount of bow on the plate at each point. A negative value is inwards.

The apex angle from two lines constructed between tooling balls 1 and 12 is 55.1272 degrees.
