DETAILS:

Below are the results of the Pair Spectrometer Detector survey performed September 2, 2004. A right-handed coordinate system was established using the geometric centerline of the Pair Spectrometer Magnet with +X to the beam left and +Y above centerline. "US_BL" = Upstream Beam Left. "DS_BR" = Downstream Beam Right. The targets measured are on the upstream face of the detectors and are used to define the position. Values are in mm.
