

DESY is one of the leading accelerator centres worldwide. The Laboratory's main research areas comprise a broad program of photon science, including construction, operation and use of synchrotron-light sources and of X-ray lasers, and research in elementary particle and astroparticle physics. Research at DESY relies on the interplay between photon science, particle physics and accelerator physics. 3000 researchers from around the world use the accelerator-based facilities at DESY.

The HERMES group is responsible for the data analysis of the experiment. In addition, the particle physicists in Zeuthen participate in experiments at the LHC at CERN and perform detector development for future accelerators. For our team in Zeuthen we are looking for an experienced

Physicist (Ph.D.) (m/f)

You will play a leading role in the reconstruction and analysis of the HERMES data. Further on, you will participate in the future projects of DESY, for instance at the LHC at CERN.

You should hold a Ph.D. in Physics and have held at least one postdoc level position. Experience with data analysis, preferably in the area of the spin structure of nucleons and nuclei is required. An interest in University level teaching and in advising of Ph.D. students is desirable. The job requires close collaboration with DESY groups and with institutes participating in the HERMES collaboration.

If you are interested in the position you are invited to send your complete application including a resume and the usual documents (curriculum vitae, list of publications and copies of university degree) quoting the reference code to our personnel department. For further information you may contact Dr. W.-D. Nowak (wolf-dieter.nowak@desy.de). The successful candidate will be offered a tenure-track position.

Salary and benefits are commensurate with those of public service organisations in Germany. Handicapped persons will be given preference to other equally qualified applicants. DESY is an equal opportunity, affirmative action employer and encourages applications from women.

Deutsches Elektronen-Synchrotron DESY
