

Research Associate Position in Nuclear Physics.

The Department of Physics and Astronomy at the University of North Carolina invites applications for Research Associate position in experimental nuclear physics. The successful candidate must have a Ph.D. in nuclear physics and is expected to conduct a major part of his/her research at the Triangle Universities Nuclear Laboratory (TUNL) which is an internationally recognized center for nuclear physics that is staffed by faculty from the University of North Carolina at Chapel Hill, Duke U. and North Carolina State U. More details about TUNL may be found at <http://www.tunl.duke.edu>. We are particularly interested in identifying individuals with strong interest in applications of nuclear physics.

Applications should be submitted to nuclear-search-2008@physics.unc.edu as PDF format attachments. If necessary, hard copy versions may be addressed to Nuclear Physics Search, c/o Ms. Cassandra Houston, CB# 3255, Dept. of Physics & Astronomy, UNC Chapel Hill, NC 27599-3255. Required materials are a curriculum vitae, a brief statement of present and three letters of recommendation to be send directly to the Search Committee. Applications completed before **August 15th, 2008** will receive full consideration. Further information about this position can be obtained by contacting Prof. H.J. Karwowski at khugon@physics.unc.edu.

University of North Carolina is an Equal Opportunity/Affirmative Action employer; we particularly encourage applications from women and minorities.
